EXPERIENCE

Frontend Engineer - Teqnoid - Gurgaon May 2024 – Present

- Developed an interactive game using Nextjs for a Japanese client's Annual General Meeting (AGM), enhancing user engagement.
- Designed and implemented a responsive website for US-based clients using P5.js and Three.js, integrating visually appealing animations and interactive elements.
- Engineered payment logic and pricing models, integrating Imagine for seamless payment page functionality tailored to US clients.
- Collaborated on a teaching channel project for a US client, contributing to backend development using .NET C# alongside frontend responsibilities.

Software Development Engineer (SDE-1) KonnectzIT, Bangalore August 2022 – May 2024

- Spearheaded the development of a responsive single-page application (SPA), improving user experience and performance.
- Integrated Paddle (UK-based payment gateway) to enable secure and efficient payment processing.
- Designed and built a ChatGPT plugin to extend platform capabilities, showcasing adaptability and innovation in AI-driven solutions.
- Expanded technical expertise by incorporating Node.js into project implementations, enhancing backend functionality.

Frontend Engineer (SDE-0) Grayquest Education Finance - Mumbai May 2022 – August 2022

- Led the development of a dynamic dashboard, enabling real-time data visualization and streamlined user interaction.

PROJECTS

Walmart E-Commerce Website

An e-commerce platform for daily necessities, built as a learning project during my coding training at Masai School.

- Tech Stack: HTML, CSS, JavaScript
- Features: Payment Page, Search & Filter, User Authentication
- Responsibilities:
 - Developed and integrated user authentication with the frontend to practice secure login implementation.
 - Created a responsive homepage to apply foundational design and interactivity skills.
 - Built a functional payment page to simulate a real-world checkout process.
- Context: Collaborated with a team of 3 to complete this beginner-friendly project in 7 days, focusing on rapid skill application during Masai School's intensive coding curriculum.

Pepperfry Furniture Shopping Platform

A furniture shopping application developed as part of Masai School's training to explore React and modern web development.

- Tech Stack: HTML, CSS, React, Redux, Tailwind CSS
- Features: Search Bar, Homepage, Routing
- Responsibilities:
 - Designed a responsive homepage using React and Tailwind CSS to enhance UI/UX skills.
 - Implemented routing with React Router to practice navigation logic in single-page applications.
 - Built a search bar with API integration to gain hands-on experience with dynamic data fetching.
- Context: Worked with a team of 5 to deliver this project in 7 days, leveraging Masai School's structured learning environment to accelerate proficiency in advanced frameworks.

EDUCATION

Masai School ,Bengaluru

Full stack web deveopment

June 2021 - March 2022

Harayna School of Business

Master of Business Adminstration

June 2018 - June 2020

Kurukshetra University

Bachelor of Commerce

June 2013 - June 2017

TECH STACK

HTML | CSS | React | Javascript | Node JS | MongoDB |
Express | NextJS | MySQL | Bootstrap | Tailwind | AWS |
Nginx | P5.js | GSAP | Three.js | .Net | C# | Angular
